Answer Sheet

1	A	I is desirable because tighter security arrangements are needed for dangerous people. II is ruled out because its efficacy is in doubt.
2	E	Both I and II are established facts and hence both I and II follows.
3	B	It is an established fact that a teenager who takes drugs will never stop it if he is beaten by the police. But the right action is to take him to a rehabilitation centre. Hence only II follows.
4	D	Both I and II are vague. It lacks substance. Nothing concrete is being said here.
5	A	If floods occur this year too, I is likely to yield positive results. II is a negative approach. We must refrain from panic but a healthy fear is desirable.
6	E	When the Government takes such an action it is necessary that people are made aware of the consequences they would face if they do not obey the directive . Hence II follows. I is obvious.
7	D	Against an epidemic, precautionary measures should be taken every year and not every four years. Hence I does not follow. II is not a preventive action against conjunctivitis. Hence II also does not follow.
8	A	To improve the hygienic conditions is always a welcome step and in view of the statement it becomes even more necessary. Hence, I unquestionably follows. But II does not. We should not medicate any child unless he has actually contracted the disease. Prevention is all right but curing should begin only after the disease has been contracted.
9	B	I is an absurd suggestion. When one industry is facing trouble because of regulations, it talks of regulating the supply of other industrial raw materials too. II is a better action because it would tend to solve the problem.

10	A	The Statement mentions a problem that most of the development plans develop on paper only. They are not materialised in reality. This problem could be solved if field work was supervised properly. Hence I follows. But II is a absurd suggestion. The issue is lack of actual field work and not misuse of paper.
11	B	An escapist's attitude does not help much. The need is to compete and emerge successful. So, only course II follows.
12	A	The effectiveness of such Control Boards is established by the fact that Orissa and A.P. have agreed to it for better control of its multipurpose projects. So, only course I follows.
13	B	The problem arising is shortage of funds. So, alternative sources of financial support need to be worked out first. Thus, only course II follows.
14	D	The ideas suggested in both I and II represent unfair means to cut competition. The correct way would be to devise methods and techniques such that the indigenous producers could produce better quality fruits and make them available in the market at prices comparable with those of the imported ones. Hence, neither I nor II follows.
15	A	The increase may not be a permanent one. So, it's better not to open new colleges but increase seats in the existing colleges. So, only I follow.
16	B	The emphasis should be not on the Government putting all the engineering graduates to jobs but on the colleges producing not 'degree-holders' but real technical minds which could compete well for gainful employment. So, only course II follows
17	B	The disease occurs at the end of monsoons every year. So, precautionary measures every four years shall not help. The second course of action shall be a preventive measure. So, only course II follows.
18	A	Clearly, the problem can be solved by warning the devotees of the excessive cold at the shrine. So, only I follow.
19	A	People cannot be deprived of going to a certain destination merely for lack of berths. Instead it is the duty of the railway authority to accommodate all the bookings by all means. So, only I follows.
20	B	Clearly, an already working Finance Minister shall know better all the plans and resources of the Government and he alone can present a suitable budget. So, course II follows.
21	B	The accidents can clearly be prevented by barring people from crossing the tracks when the gates are closed, So, only II follows.
22	D	Clearly, the situation demands that efforts be made to remove the lackenings in the present system of education and adequate measures be taken to improve the performance of students. Harsh measures as those given in I and II, won't help. So, none of the given courses follows.
23	B	Since the act has been repeated despite various warnings, so course I would only be another warning and would not help. Severe punishment to set example for him and others is inevitable. Thus, course II shall follow.

24	E	To ensure that debts taken are repaid promptly, the customer's requirements and future prospects ought to be studied and their work constantly checked. Thus, both the courses follow.
25	E	There being faulty questions in the examination paper is a blunder on the part of school management and students should not be made to suffer on account of this. Thus, a re-test should be organised for the students and those responsible for the error be penalised to prevent reoccurrence of such mistake in the future. Hence, both the courses follow.
26	B	Clearly, the non-infected persons should not be debarred from visiting India. So, only course II follows.
27	D	Re-election would demand repeated expenses and following course II would reduce the voter base permanently. Instead, awareness should be created among the people to use their right to vote effectively. So, neither I nor II follows.
28	A	Clearly, proper supervision alone can see the development in practice. So, only course I follows.
29	E	Clearly, both the courses of action seem appropriate to prevent black-marketing in case of shortage. Hence, both I and II follow.
30	B	The statement implies that capsule Vitamin E does not function so effectively as natural Vitamin E. Since no negative effect of capsule Vitamin E is mentioned, so I does not follow. Hence, only II follows.
